Button 2 Action
Redo
Pressure sensitivity
ON
Before you start ArtStudio, Adonit Jot Touch must be paired with the iPad.
To pair stylus open iPad settings->general->bluetooth.
Then press and hold both jot touch buttons, after 5-10 secs Adonit Jot Touch should be visible in bluetooth settings, tap on it.
Then start ArtStudio, if it was already started, remove it from background and start again.
After start, you should see a message that Jot Touch is connected.
To use pressure sensitivity of stylus, open settings of any tool, for example pencil, enable "pressure sensitivity->size" or/and "pressure sensitivity->opacity", and set size-start or/and opacity-start to a minimum value.

FAQ
Can I import projects from the old ArtStudio?
Yes, in top menu select: File->Open, then choose 'Legacy'.
I bought additional brushes, where are they?
Open the settings of any drawing tool tool by taping and holding the tool icon. Tap on the brush group name in the settings to open the brush list, all free and purchased brushes are shown here.
I cannot see some of the tools: clone, dodge/burn etc, where are they?
The Left and right toolbars are scrollable, scroll down to dislpay more tools.
Can I customize the color swatches in the right toolbar?
Yes, tap the top color icon in right toolbar to open the color pallet. Choose a new color to add to the toolbar, simply drag your new color to one of the swatches below and your new color will be added to the toolbar.
Is it possible to quickly swap Color1 and Color2?
Yes, just double tap the split color icon in the right

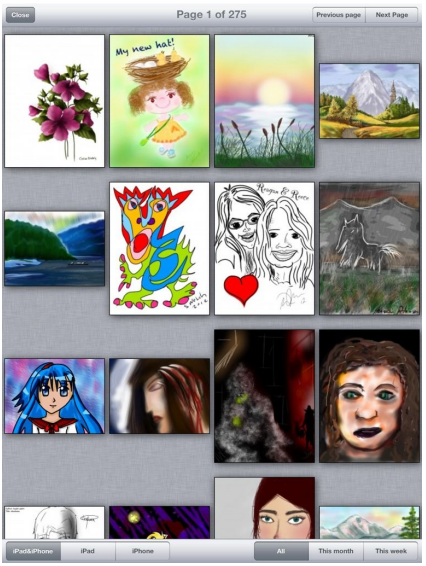
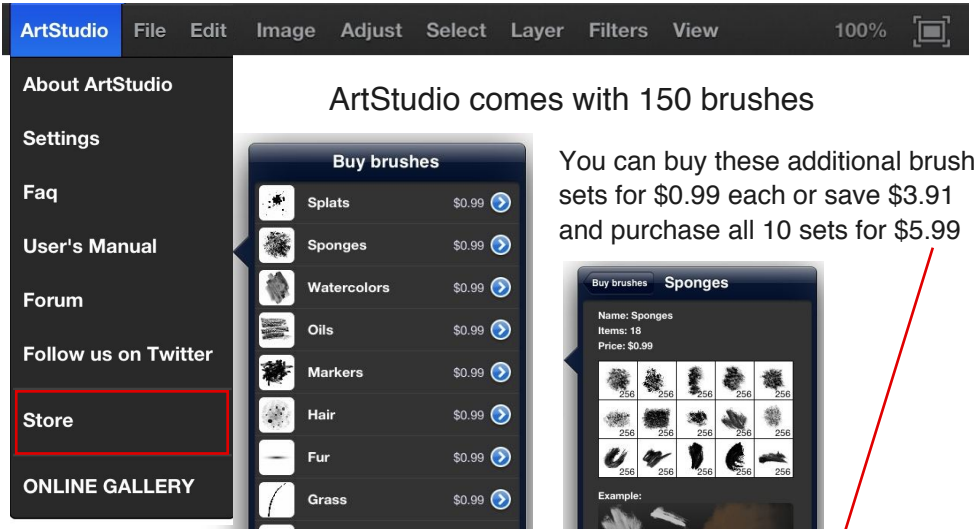
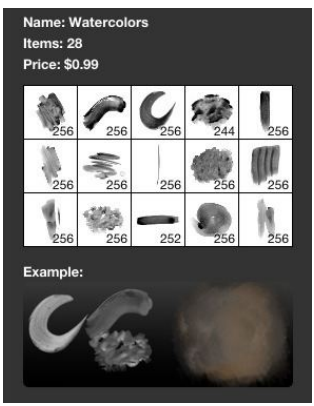
Have you created any nice images in ArtStudio app? You can post them here.
Additional Information

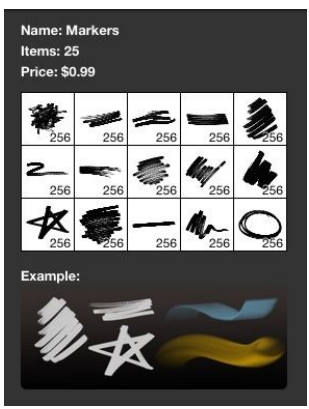
Online Gallery



ArtStudio Store

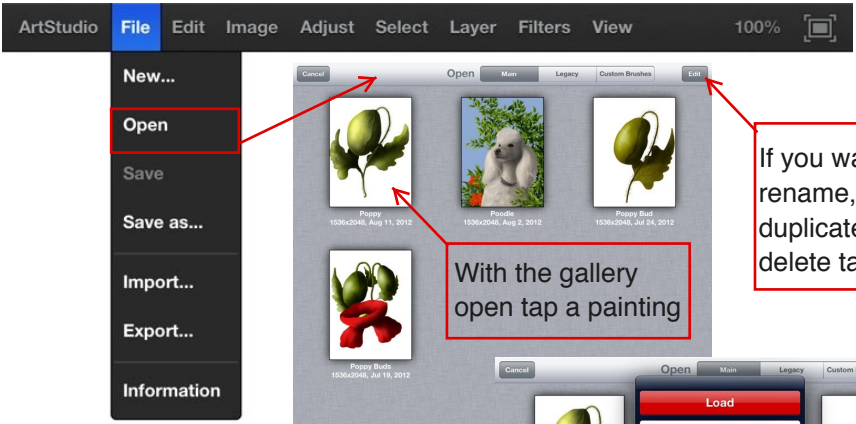






File New Image

File Open image

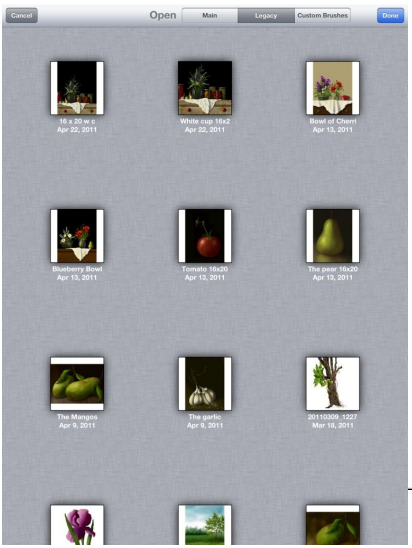


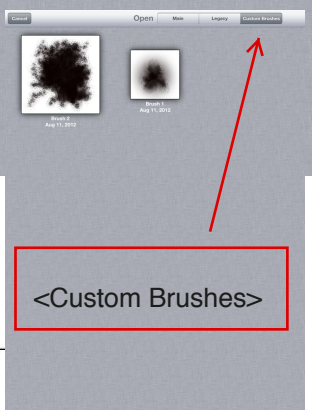
If you want to rename, duplicate or delete tap <Edit>

With the gallery open tap a painting

Tap <Legacy> to view older paintings from previous ArtStudio

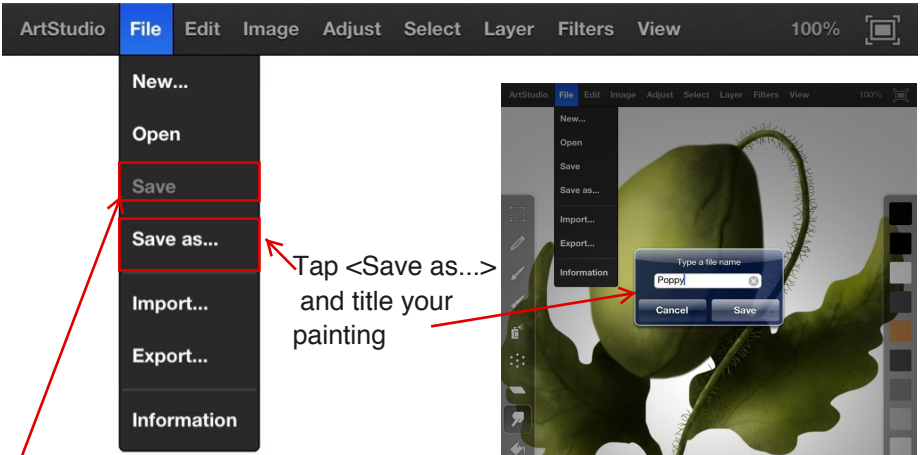
Tap the painting you want to edit and tap done





<Custom Brushes>

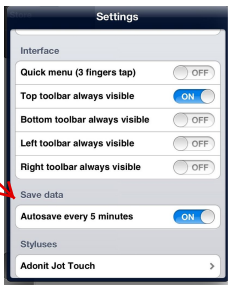
File Save as...



Tap <Save as...> and title your painting

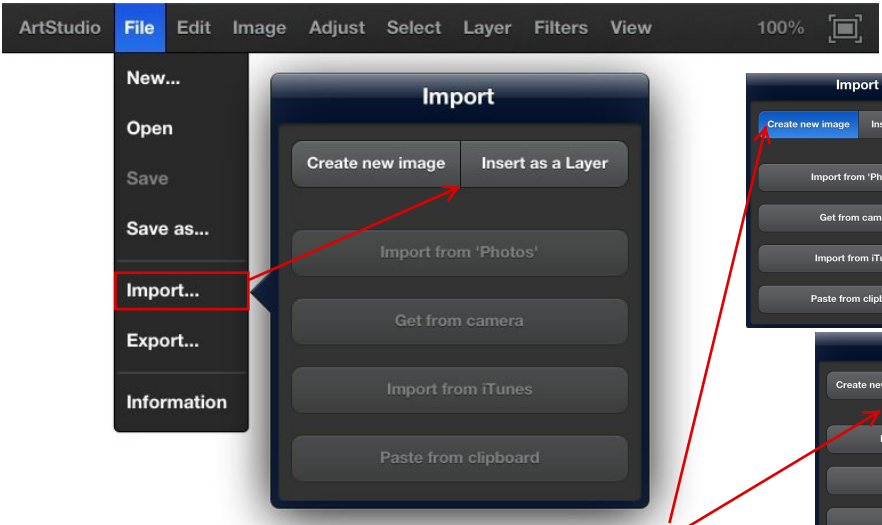
You can also tap <Save> to save new version of the same file name

In settings you can select "Autosave every 5 minutes"



You also can tap <Save> at any time

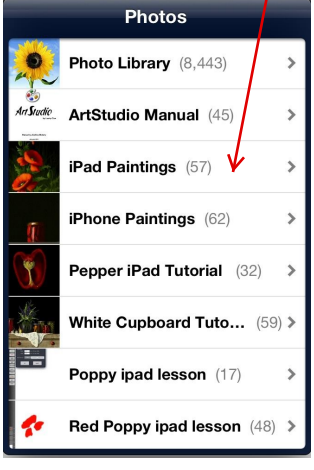
File Import



Tap <Import...> and choose <Create new image> or <Insert as a layer>

Tap <Import from 'Photos'> in this example

Tap on the album



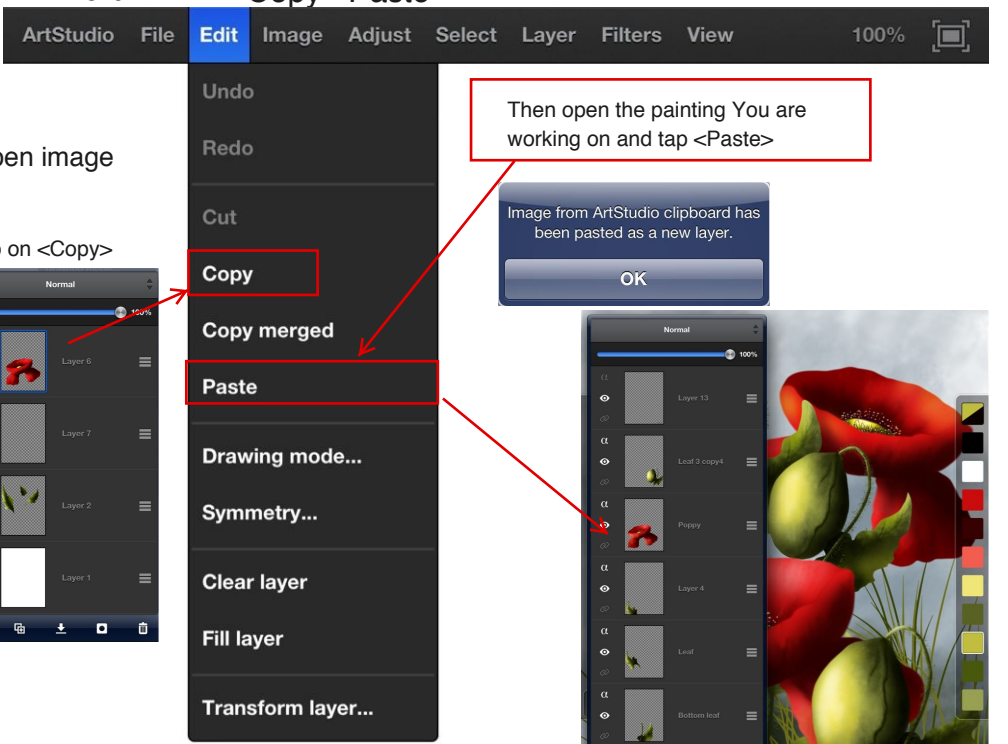
Tap the photo you want

File Export

Before you export an image, choose file format:

JPG - small file, transparency not supported
PNG - larger file, lossless quality, transparency supported
PSD - use this to export all layers and continue working on computer

Edit Copy Paste To copy another image from another painting



Open image

Tap on <Copy>

Then open the painting You are working on and tap <Paste>

Use <Transform layer...>

In this example I pasted the Bud three times

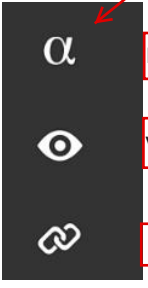
Next page explains Layers in the Bottom Toolbar

Layer

Layers in the Bottom Toolbar

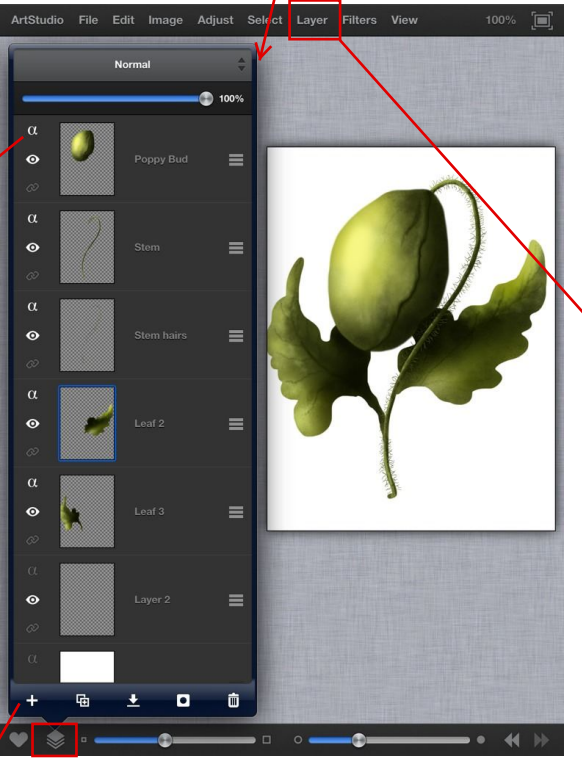
Tap <Layer icon> on Bottom Toolbar

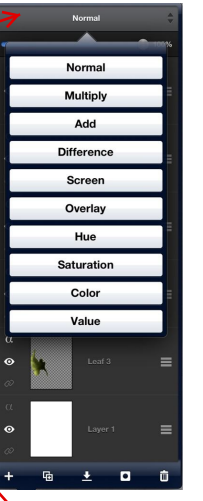


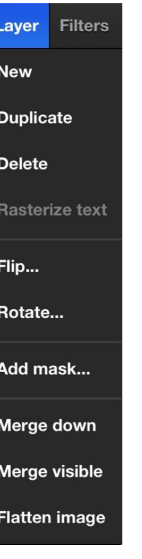
Lock alpha icon

Visibility icon

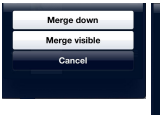
Link icon

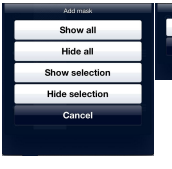


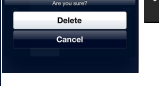


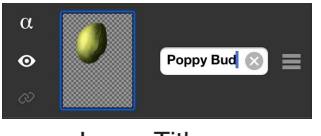


Link icon is used in transforms (move, scale, rotate) all linked layers Are transformed together.





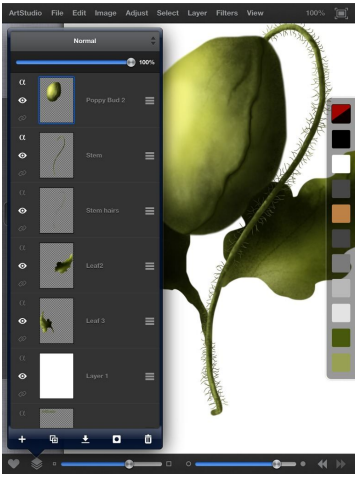


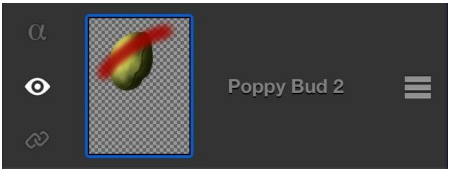


Layer Titles

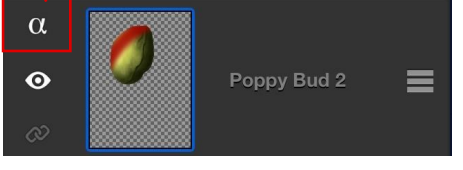
Layer

Lock alpha

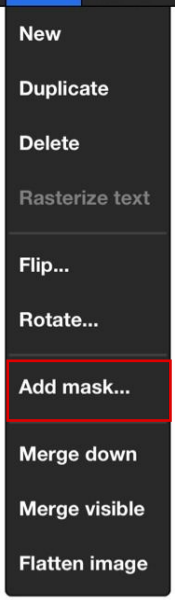




When layer has "lock alpha" enabled, you can modify on pixels colors, not its transparency

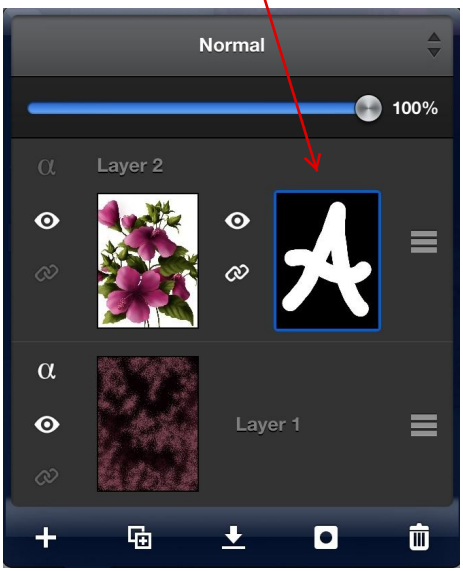


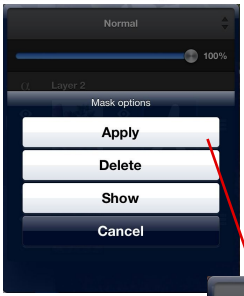
Layer Masks



The layer mask allows you to hide parts of your image without actually making adjustments to the image itself, thus leaving your image intact at all times.

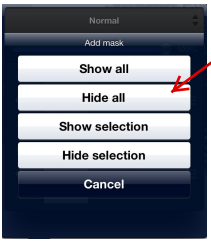
To create a layer mask





If active item in layers popover is a mask.

You have 3 option:
Apply mask (mask will be removed)
Delete mask
Show black and white mask content on canvas
instead of displaying the layer



Add mask in 4 ways:

Show all - white mask
Hide all - black mask
Show selection - selected area will be white, the rest - black
Hide selection - selected are - black, the rest - white
